17-8-9+3MgO+TE

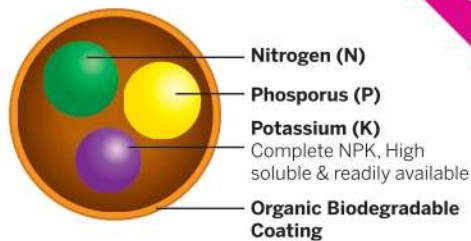

CONTROLLED RELEASE FERTILIZER

*Proven in Nursery,  
Best for Field Planting.*

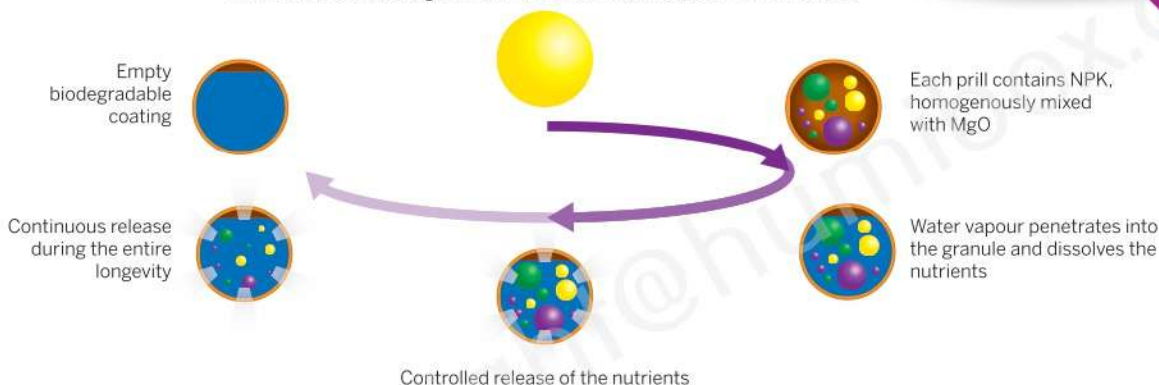

## WHAT IS HUMICOTE

HUMICOTE is a controlled release fertilizer (CRF) designed specially for oil palm, leguminous cover crops, fruits and vegetables. HUMICOTE consists of NPK granules coated with permeable organic biodegradable layer.

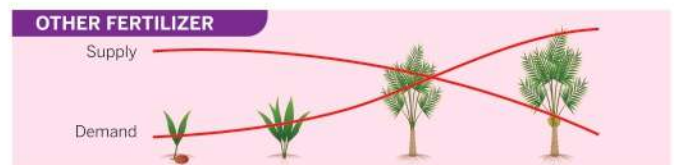

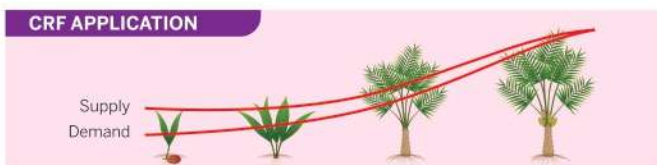

## HOW DOES HUMICOTE WORK?

Granule coated with organic resin which controls the daily nutrient release

## PRODUCT ADVANTAGES

- Continuous nutrient supply to all stages of the crop cycle.
- Steady and consistent release will lead to uniform crop growth.
- Safe to use, with low EC in the soil in the early stage of the crop when roots are still sensitive to high salt concentrations.
- Ideal to be applied in the planting hole, close to the root zone.
- Easy to use, simple one-time application method.
- Environmentally friendly - Minimize leaching losses of nutrients through rainfall or irrigation.

## RECOMMENDED APPLICATION RATES

CROP	STAGE	APPLICATION AND RATE
Oil Palm	Pre-nursery	3-5g/palm (for planting trays and polybags)
	Main nursery	50g/pam
	First year planting	300g/palm
<i>Mucuna Bracteata</i>	Nursery	3g/hole (planting tray)
Others LCC		1kg HUMICOTE for 1kg seeds
